 CodePen

Summary: I am a solution orientated developer, who is about being resourceful and being efficient. I am motivated for self improvement. During my free time, I am currently taking online coding classes. I am learning the Angular framework at the moment. Also, I am training my problem solving skills by solving LeetCode questions.

Web Development Projects

Golden Products: an E-commerce demo website

This project is powered by Wordpress, hosted by HostMonster. Products include services, virtual products, and physical products.

- Includes customer accounts for returning customers
- Includes coupons, on sale items, and price filters for a fluid shopping experience

Zentatap: a Patatap clone with calming sounds and bubbly animations

This project is created with simple HTML, CSS, and paperscript. Hosted on Heroku with the aid of the node serve package.

- Players press any A - Z key to generate bubbles and calming sounds

Ipsum Blog: a blog demo Website

This project is powered by Wordpress, hosted by HostMonster.

- Includes Google Maps API, and an active contact form
- Name and Email in comment section can be saved for returning users

Work History
